Public Fire Service Course Dates
January - June 2013

South Carolina Department of Labor, Licensing and Regulation
Division of Fire and Life Safety
South Carolina Fire Academy

Schedule Information

This catalog supplement contains the scheduled courses offered by the South Carolina Fire Academy from January - June 2013. Courses are listed by region, with location and start dates. End dates are included, when possible. All courses will start on the date shown, but the meeting days or ending dates may be adjusted after the course starts to better accommodate student needs.

Please refer to the FY-2013 Curriculum Catalog for course descriptions, including prerequisites, minimum and maximum number of students allowed, length and cost. Information is subject to change at the discretion of the S.C. Fire Academy or the Department of Labor, Licensing and Regulation (LLR). Be sure to review this information as some programs may have been updated. Policies on student eligibility and conduct, Fire Academy facility information, certification procedures, regional office information and other important matters are also included. Courses not scheduled in this supplement may be available for delivery on request, provided certain criteria are met. If a course is not listed that your department could benefit from, contact your regional supervisor for more information.

Course Registration Deadline

The S.C. Fire Academy will adhere to a mandatory two-week registration deadline for most Fire Academy courses. Courses where study material is mailed to the student will maintain a 30-day deadline.

National Fire Academy Direct Delivery

The direct delivery programs listed below will be taught at the S.C. Fire Academy during 2013. These programs are funded by the NFA and taught by NFA adjunct instructors. Refer to the Resident Program section of this insert for dates and times. Per NFA requirements, registration for these classes closes 40 days prior to the start date for each class. The minimum number of students required for each class is 20.

7232-13001	Juvenile Firesetter Intervention Specialist I	Jan. 29-30
7238-13001	Department Wellness Coordinator	Mar. 26 - 27
7233-13002	Juvenile Firesetter Intervention Specialist II	May 21-22
7177-14001	Training Operations in Small Departments	Sept. 10 - 11

EMD Grant Program

The Fire Academy has received grants from FEMA through the S.C. Emergency Management Division (EMD) to provide certain specialized training. Grant-funded programs are offered at no cost and are marked with a (▼) symbol. For specific details and to arrange for course delivery, contact your county EMD coordinator. Funding is limited and may not be available for all requests.

NFA / FEMA Command Training Grant

The Fire Academy has received a grant from the NFA and FEMA to conduct command training programs throughout the state. This grant supports the delivery of NFA hand-off courses and the delivery of selected NFA regional, resident and direct delivery courses.

These courses will be offered at locations throughout the state and include:

Shaping the Future	Incident Command for High Rise Operations
NIMS/ICS for the Fire Service	Fire Service Supervision: Personal Effectiveness
Leadership I: Company Success	Fire Service Supervision: Team Effectiveness
Leadership II: Personal Success	Preparation for Initial Company Operations
Leadership III: Supervisory Success	Strategy and Tactics for Initial Company Operations
Health and Safety Officer	Decision Making for Initial Company Operations
Incident Safety Officer	Introduction to Unified Command
Managing in a Changing Environment	Incident Command for Structural Collapse Operations
Arson Detection for First Responders	Introduction to Volunteer Fire Service Management
Principles of Building Construction: Combustible	
Building Construction for Fire Suppression Forces: Noncombustible and Fire Resistive	

These courses will be offered in addition to regularly scheduled Fire Academy classes. You may register for these courses as you would for any other Fire Academy program. The NFA/FEMA grant classes are designated with a (◆) symbol.

Changes to NFA / FEMA Registrations

The S. C. Fire Academy hosts a number of National Fire Academy classes through direct delivery or hand-off classes. Effective **October 1, 2012**, a FEMA Student Identification Number (SID) is required when registering for a NFA course or applying for a SCFA class that is under the FEMA grant category. A lists of the affected classes is provided above in NFA/FEMA Command Training Grant section.

It is the responsibility of the student to obtain this number prior to coming to class or submitting a registration direct to the NFA. We do not require a FEMA SID number on the Fire Academy registration form but we provide a NFA application form during the class for you to obtain NFA transcript credit. This is where you will need a FEMA SID number.

Access <https://cdp.dhs.gov/femasid> for more information and instructions for obtaining your FEMA SID number.

S.C. Fire Academy's Online Learning Community

Fire certification training is only a click away through the S. C. Fire Academy's Online Learning Community. These web-based courses offer an alternate delivery method for students who otherwise may not be able to travel to attend traditional courses. Providing more training to more firefighters better prepares our communities in the event of a disaster, protects property, and saves lives.

Course Categories

Independent Study

Independent study courses provide strictly web-based instruction that includes multimedia presentations, video instruction, written activities, and competency testing. After registering for the course, independent study students complete the entire course online and are not required to attend face-to-face classes.

Courses currently offered in the independent study format:

1427 - Hazardous Materials Awareness

Blended Learning

This category uses a "virtual classroom" as its primary means of instruction. This course format blends online learning with a face-to-face, applied learning/concept development phase to help students attain the critical thinking skills fire service professionals require. During the online portion, students view web-based interactive modules, complete written assignments, review online study materials, and interact with their instructor and other students through the course's discussion forums. At the completion of the online portion, students meet in person with the instructor for team-building and other applied learning activities and to complete a proctored certification test. These courses typically include a face-to-face orientation session, an eight-week "at home" period, and traditional classroom sessions.

Courses currently offered in the blended format:

- 2101 - Fire Officer I
- 4170 - Fire Instructor I

Hybrid eLearning

The Academy’s hybrid eLearning courses require greater technical skill development and combine elements of both independent study and blended learning. In a hybrid course, students must first successfully complete an online independent study portion before participating in face-to-face skill development sessions. Students work at their own pace to complete the online reading assignments and instructor-led activities, watch skills videos, and review study guide questions. The online portion also includes competency testing through required online chapter/module tests. Students must successfully pass all online tests to qualify for the instructor-led skill development and evaluation sessions, where the skills are taught, practiced, and evaluated.

Courses currently offered in the hybrid eLearning pilot format:

- 1401 - Firefighter I
- 1428 - Hazardous Materials Operations

These courses will become available to the general fire service in July 2013. For additional information, refer to the Fire Academy’s website at www.scfa.state.sc.us under the link “On-Line Training.” Note that each course has three parts: an independent on-line portion, a “live” hands-on skill development portion and a final evaluation day with both written and practical skill evaluations. More information will become available in the coming months.

How to Enroll

To enroll in the S.C. Fire Academy Online Learning Community, students must preregister by downloading and printing a registration form from the SCFA web site and mailing or faxing the form to the Academy at least 30 days before the course’s start date. Students will receive information either through e-mail or a standard letter that will explain how to create an online account and how to log-in to the course. Each course may have different completion and participation requirements, which will be communicated upon enrollment. If you have any questions, please contact our online training staff at OnlineTrainingSupport@llr.sc.gov or call 803-896-9078.

Please refer to the Fire Marshal website (www.scfiremarshal.llronline.com) for specific course information and requirements, reference materials, codes and standards required for these courses. Students are required to bring codes, standards and other books where applicable. The website lists proper editions to bring to class. If the catalog states that pre-course assignments are included, the material will be shipped to the student upon class acceptance. These pre-course assignments are required and must be completed before the first day of class. The website also provides street addresses for quarterly training sites at off campus locations.

Preparing for a Practical Certification Exam

Practical certification exams are conducted at the conclusion of certain courses.

- The Firefighter I Practical Certification Exam is conducted at the conclusion of course *1153 - NFPA Firefighter I*.
- The Firefighter II Practical Certification Exam is conducted at the conclusion of course *1154 - NFPA Firefighter II*.
- The 1002 - Driver/Operator-Pumper practical exams are given at the conclusion of courses *1220 - Pump Operations I*, *1221 - Pump Operations II* and course *1210 - Emergency Vehicle Driver Training*.
- The practical exam for Instructor I is conducted at the end of course *4171 - Fire Instructor I*.

Based on this evaluation method, these courses are prerequisites to completing the written certification examination. Students who are successful in the course should be well prepared to take the practical skills exam. However, since the practical skills examinations contain several objectives, which they may be asked to perform, students should be prepared to perform all of the manipulative or practical objectives listed in the NFPA standard for that certification level.

Practical skills tests are graded on a pass/fail system with a passing score required for successful completion of the certification exam. "Passing" means that the student performed the skill correctly, while "failing" means that the student performed the skill unsafely or to the point of being ineffective.

Each student will be given two attempts to perform each required skill during the same test session. Should the student not receive a pass rating on the initial attempt, the student will be eligible for an immediate second attempt. Students will be retested only on the skill that was not performed satisfactorily after two attempts. One retest opportunity is allowed for students failing to meet the minimum score for a practical skills exam. Any student failing to complete the second attempt will be required to retest the failed skill at a later date. The student must wait at least 30 days before retesting. Failing the retest requires the student to retake the entire training program before being eligible again for retesting.
