## Public Fire Service Course Dates *July - December 2010*

South Carolina Department of Labor, Licensing and Regulation  
Division of Fire and Life Safety  
South Carolina Fire Academy

## Schedule Information

This catalog contains the scheduled courses offered by the South Carolina Fire Academy from July - December 2010. They are listed by region, with location and start dates. End dates are included when possible. All courses will start on the date shown, but the meeting days or ending dates may be adjusted after the course starts to better accommodate student needs.

Please refer to the FY-2011 Curriculum Catalog for course descriptions, including prerequisites, minimum and maximum number of students allowed, length and cost. Information is subject to change at the discretion of the S.C. Fire Academy or the Department of Labor, Licensing and Regulation (LLR). Be sure to review this information since some programs have been updated. Policies on student eligibility and conduct, Fire Academy facility information, certification procedures, regional office information and other important matters are also included. Courses not scheduled in this supplement may be available for delivery on request, provided certain criteria are met. If you do not see a course listed that your department would like, contact your regional supervisor for more information.

## Course Registration Deadline

The S.C. Fire Academy will adhere to a mandatory 30-day registration deadline for all Fire Academy courses.

## Registration Fee Notes for NFPA Inspector Curriculum

Effective immediately, all fees must be prepaid at the time of registration for the following courses:

- 3226 - NFPA Certified Fire Inspector I
- 3228 - NFPA Certified Plans Examiner
- 3229 - NFPA Certified Fire Inspector II

These fees are nonrefundable after the registration cutoff date. All three courses have a 30-day course cutoff.

## National Fire Academy Direct Delivery

The direct delivery programs listed below will be taught at the S.C. Fire Academy during 2010. These programs are funded by the NFA and taught by NFA adjunct instructors. The dates and course information are listed below. Refer to the Resident Program section of this insert for dates and times. Per NFA requirements, registration for these classes closes 30 days prior to the start date for each class.

7196-11001	Marketing Fire Prevention in Your Community	.....	Sept. 14 - 15
7232-11001	Juvenile Firesetter Intervention Specialist I	.....	Nov. 2 - 3

## EMD Grant Program

The Fire Academy has received grants from FEMA through the S.C. Emergency Management Division (EMD) to provide certain specialized training. Grant-funded programs are offered at no cost and are marked with a (▼) symbol. For specific details and to arrange for course delivery, contact your county EMD coordinator. Keep in mind that funding is limited and may not be available for all requests.

## NFA / FEMA Command Training Grant

The Fire Academy has received a grant from the NFA and FEMA to conduct command training programs throughout the state. This grant supports the delivery of NFA hand-off courses and the delivery of selected NFA regional, resident and direct delivery courses.

These courses will be offered at locations throughout the state and will include:

- Shaping the Future**
- NIMS/ICS for the Fire Service**
- Leadership I: Company Success**
- Leadership II: Personal Success**
- Leadership III: Supervisory Success**
- Firefighter Health and Safety**
- Health & Safety Officer**
- Incident Safety Officer**
- Managing in a Changing Environment**

## Upcoming Curriculum Program Changes

At the time of printing this catalog and course date insert, changes to some of our curriculum offerings were uncertain due to curriculum development factors. The two hazardous material courses listed below are in the pilot delivery process and necessary changes, or lack of changes, could effect the implementation date. The dates shown below are tentative for future planning or scheduling.

### **Course 2727 - Hazardous Materials Awareness Level -- 8-hour program**

This program will become a prerequisite for the new 4-day Hazardous Materials Operations course effective Jan. 1, 2011.

### **Course 2728 - Hazardous Materials Operations Level -- 32-hour program**

The current 24-hour Hazardous Materials Operations Level program will become a 32-hour program effective Jan. 1, 2011.

### **Course 2121 - Decision Making for Initial Company Operations -- 16-hour program**

This new course is the final of the three courses developed to replace the MCTO series several years ago. The prerequisite for this course will be course 2119, STICO - Strategy and Tactics for Initial Company Operations. This course will be available for scheduling after Jan. 1, 2011.

### **Course 2101 - Fire Officer I - Blended Learning - Traditional / On-line sessions**

This new course will be offered during the July - December time frame on a limited basis. Dates will be published at a later time.

Using a practical blended approach to learning, this Fire Officer I course offers instruction in a highly engaging format. Pre-course assignments introduce the course content. The six on-line learning modules make use of video, interactive knowledge checks, and other types of multimedia to reinforce the content. Access to an on-line learning management system provides a "home base" for students to retrieve reading assignments and supplemental activities, take practice tests, chat with other students, and receive feedback from the instructor.

Live classroom sessions allow for face-to-face interaction with the instructor to help ensure mastery of the skills necessary for taking on a leadership role in today's fire service. The course addresses the 2009 edition of NFPA 1021: Standard for Fire Officer Professional Qualifications and prepares students for the following tasks: supervising personnel, assigning tasks, solving personnel performance problems, applying departmental policies, working with the local community, ensuring firefighter safety, performing fire and life safety inspections and performing typical company officer administrative functions.

Students must attend an orientation meeting before the pre-course period, at which time they will receive their textbook, assignments and introductory materials. The blended portion of this training includes an eight-week pre-course period, where students complete nine assignments and work through the web-based modules. Allowing students to complete the pre-course work at their stations or at homes reduces travel cost and allows students to learn at their own pace and receive more individual attention from the instructor. At the completion of the pre-course period, the student must attend a four-day class conducted in a traditional setting to provide an opportunity for group discussions, chapter reviews, additional assignments, multimedia activities and IFSAC-endorsed Fire Officer I certification testing.

Upon successful completion of the course and the certification exam, the student will earn a Fire Officer I IFSAC-endorsed certificate.

Technology requirement: Students must use a computer with a high-speed internet connection to complete the on-line learning modules.

Prerequisite: NFPA Fire Instructor I, NFPA Firefighter II, 2137 or 2147 or equivalent I-200 training

Hours: 32 in-class

Students: Min.: 12 Max.: 16

Cost: call for pricing

## Preparing for a Practical Certification Exam

Practical certification exams are conducted at the conclusion of certain courses. The Firefighter I Practical Certification Exam is conducted at the conclusion of course *1153 - NFPA Firefighter I*. The Firefighter II Practical Certification Exam is conducted at the conclusion of course *1154 - NFPA Firefighter II*; the 1002 - Driver/Operator-Pumper practical exams are given at the conclusion of courses *1220 - Pump Operations I*, *1221 - Pump Operations II* and course *1210 - Emergency Vehicle Driver Training*; and the practical exam for Instructor I is conducted at the end of course *4171 - Fire Instructor I*. Based on this evaluation method, these courses are prerequisites to completing the written certification examination. Students who are successful in the course should be well prepared to take the practical skills exam. However, since the practical skills examinations contain several objectives, which they may be asked to perform, students should be prepared to perform all of the manipulative or practical objectives listed in the NFPA standard for that certification level. All practical skills tests are graded on a pass/fail system with a passing score required for successful completion of the certification exam. Passing means that the student performed the skill correctly, while failing means that the student performed the skill unsafely or to the point of being ineffective. Each student will be given two attempts to perform each required skill during the same test session. Should the student not receive a pass rating on the initial attempt, he/she will be eligible for an immediate second attempt. Students will be retested only on the skill that was not performed satisfactorily after two attempts. One retest opportunity is allowed for students failing to meet the minimum score for a practical skills exam. Any student failing to complete the second attempt will be required to retest the failed skill at a later date. The student must wait at least 30 days before retesting. Failing the retest means that the student must retake the training program before being eligible for retesting again.
